

Dixon Hughes Goodman is committed to providing hospitals and health systems with exceptional service and assistance when addressing the challenges of today's changing healthcare industry. Part of that commitment is reflected in our team of professionals that focus exclusively on reimbursement services.

Medicare/Medicaid DSH

Our Disproportionate Share (DSH) Reimbursement team, a group of individuals within our healthcare reimbursement team, is dedicated entirely to working with Medicare and Medicaid DSH. Since 2004 our DSH team has completed over 250 Medicare DSH projects and recovered more than \$60 million in Medicare DSH reimbursement for our hospital and health system clients.

Now more than ever providers should be securing every opportunity and reimbursement dollar related to patient care, including DSH. As a top ranked healthcare consulting firm, the Dixon Hughes Goodman Healthcare Services Group offers core accounting and advisory services to improve your hospital's bottom line through an experienced-based integrated approach.

Clients of the Healthcare Services Group benefit from our specific knowledge and experience in DSH and reimbursement issues, as well as our ability to call upon others within the firm who are experts in other specific components of healthcare finance.
