

Dixon Hughes Goodman is a dynamic firm of CPAs providing audit, tax and management advisory services, primarily to healthcare, insurance, manufacturing, distribution, financial and auto dealership clients. As the largest Southeast-based CPA firm, we combine deep industry experience, comprehensive accounting and advisory services, and a strong commitment to personal service. Partners located throughout the region direct our resources to your best advantage.

Manage Risk. See Results.

While you know that risk is an unavoidable part of doing business, successfully managing risks means greater value for you and your stakeholders. A determining factor of most companies' success is their ability to process information that is timely, reliable and accurate.

Technology-based solutions continue to change quickly, and special skill sets are required to implement and manage the hardware and software used by companies of all sizes. As a result, risk associated with information systems and the infrastructure needed to support those systems is one area of risk that is often ignored unless problems arise.

Dixon Hughes Goodman can help. Our team of IT risk and advisory professionals serves clients in a variety of industries by helping them build and adapt risk management capabilities in times of significant expansion and regulatory change. Our professionals have industry and public accounting experience—key to understanding changing compliance requirements and the impact of new processes and technologies being used by our clients.

Our commitment to you is excellence—delivering quality without compromise to demonstrate accountability, to exceed client expectations, and to strive to raise the bar and be the best.
